

Help Sally the Skeleton!

DePuy Synthes design and make tools to help people feel better if they have problems with their bones and joints. This includes what you can see on Sally's hip and knee!

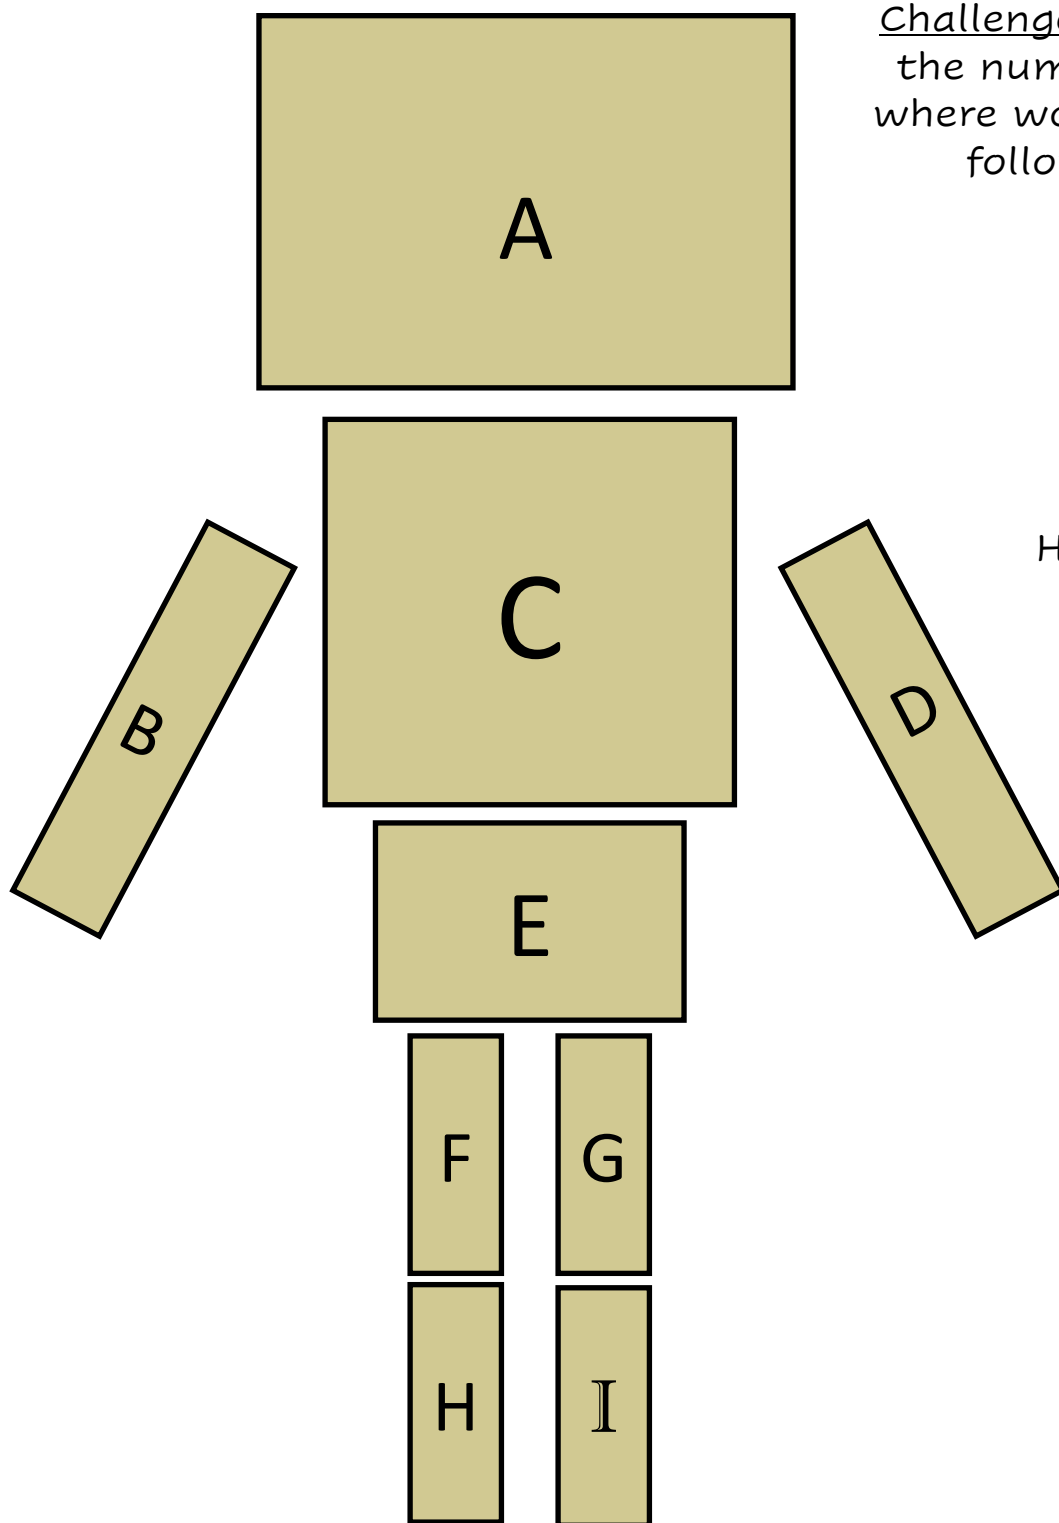

Activity 1: Sally has had an accident and **needs your help** to put her back together! Cut out the pieces below and glue Sally back together on a separate piece of paper (if you don't have a printer, see Page 2).

Challenge! Can you match the body parts with their names? (see Page 2)

Help Sally the Skeleton!

Activity 1 (no printer): Match the numbers on Page 1 to the lettered boxes below to piece Sally back together!

Challenge Activity: Using the numbers on Page 1, where would you find the following bones?

- Skull?
- Ulna?
- Femur?
- Ribs?
- Pelvis?
- Humerus?
- Tibia?
